

PEZmojis

Emoticons, smileys or emojis – mobile communications just wouldn't be the same without them. One little character is all it takes to express tone of voice, facial expressions and gestures, in other words, feelings. **PEZmojis have become a popular gift – not only (but also) from people of few words.** The only one to make it through from last year's range is the poop dispenser. New additions include mean-smirking, laugh-out-loud, glitzy poop and thumbs-up

dispensers. The story behind the laugh-out-loud dispenser is rather special: it was voted into the new line-up by social media users.
